

Expertise

- Frontend: Angular · React · Vue · jQuery · TypeScript · RxJS · HTML · CSS
- Backend: Python · Django · FastAPI · Java · MySQL · PostgreSQL
- ML: Classic ML · Computer Vision · Scikit-learn · TensorFlow

Education

Budapest University of Technology and Economics (**BME**) - BSc in Computer Engineering
(sep 2024 - jan 2028)

Exchange at University of Twente

(february 2026 - august 2026)

Full Stack developer

Budapest University of Technology and Economics (august 2025 - present)

Developed frontend for [Automated Assessment System](#) - product, allowing teachers to generate tasks for assignments using AI and evaluate them in a few clicks - at AUT (Department of Automation and Applied Informatics).

Outsource at Puzzlenetwork (june 2024 - august 2025)

[Puzzlenetwork](#) is a rapidly growing blockchain ecosystem, with a decentralized exchange (DEX) at the center, it optimizes the trade routes to make profit out of every transaction.

- Developed websites from scratch on React and Angular
- Maintained working websites
- Integrated frontend app directly with **blockchain**
- Designed from references, using a scheme and worked with a complete template
- Moderated tests on first customers of a product

Developed products: [Puzzleswap](#) · [Pluto](#) · [Pluto DAO](#) · [Puzzle Lend](#) · [Mega Meme](#)

Projects (september 2021 - june 2024)

Developed projects in educational environment being engaged in divergent IT spheres

- Frontend development (pure JQuery, Vue, Angular, React) - mostly worked with API's
- Backend development (Python: Django, FastAPI) - built facade API's to aggregate data
- Desktop development (Delphi 7, Java) - wrote some windows educational applications
- Hardware-oriented development (C, Python scripts) - Arduino, low-level Windows scripts
- Team leading - managed small teams (2 - 5 people) on top of the developer role

Developed projects: [hao.vc](#) · [Laterem](#) · [Purples](#) · [Boardcast](#) · [SQL Teacher](#) · [Math Modeling](#)

Achievements

Got the second place on the HERE Eindhoven GeoSpatial Hackathon in solo (29.05.2026)

Won a challenge of the [INEC IT Day](#) (06.03.2025)

Won the [Watt's Up? Hacking for Energy Efficiency](#) hackathon (22-23.02.2025)

Obtained 2 gold graduation medals for high school performance (06.2024)

Semi-Finalist in [TON Hackathon](#) (04.06.2024)

Got the first place at [Central University](#) Bootcamp (14-16.03.2024)

Developed a project during [School of IT Solutions](#) (19.09.2023-26.12.2023)
