

Alexander Zhuravlev

Frontend Developer · Angular · TypeScript · RxJS

Budapest, Hungary · +36 70 542 3584 · zhur06@gmail.com · github.com/Zhur06

SKILLS

Frontend	Angular (16+) · TypeScript · RxJS · Angular Material · React · Vue 3 · HTML / CSS
Backend	Python (Django, FastAPI) · REST APIs · PostgreSQL · MySQL — <i>own projects</i>
Tooling	Git · Docker · Linux · Scrum / Kanban · AI tools (Claude, Copilot, Cursor)
Familiar with	Java · Haskell · C# · C / Arduino · scikit-learn · TensorFlow

EXPERIENCE

R&D Frontend Developer — Budapest University of Technology and Economics (BME) Aug 2025 – Oct 2026

Automated Assessment System — a platform that allows teachers to generate assignment tasks and evaluate submissions in a few clicks. Covers all needs of assessment flow for lecturers, instructors and their students.

- Sole frontend developer: built the teacher workflows for AI task generation and grading end to end.
- Own the client's architecture, UI and API integration — Angular, TypeScript, RxJS.
- Piloted the platform with selected users, then moderated exams on it in different courses and languages.

Frontend Developer (contract) — Puzzle Network

Jun 2024 – Aug 2025

*Decentralised-finance (DeFi) platform: crypto trading and lending with no bank or broker in between. Its core, **Puzzleswap**, is a crypto exchange (DEX) that finds the most profitable route for every trade.*

- Shipped the frontends of **Puzzleswap** (exchange), **Pluto** (community token), **Pluto DAO** (community voting), **Puzzle Lend** (lending) and **Mega Meme** (token launches) in React and Angular, several from scratch.
- Integrated the apps directly with several blockchains, so users trade from their own crypto wallets.
- Built Puzzleswap's liquidity-range interface for liquidity providers (users who supply trading funds and earn fees) and Pluto's treasury (community fund) page.
- Turned mockups — or reference designs, where none existed — into production UI under tight deadlines.
- Moderated user testing with the first customers of a new product.

PROJECTS

Purples — AI salary predictor for HR tech · sole frontend developer · Angular 17, RxJS	2024
Boardcast — collaborative whiteboard, CROC School of IT Solutions · team lead · Vue 3, Fabric.js	2023
Laterem — LMS generating a unique task variant per student · Vue 3 frontend	2023

EDUCATION

BSc Computer Engineering — Budapest University of Technology and Economics

Sep 2024 – Jan 2028

Exchange semester — University of Twente, Netherlands

Feb – Aug 2026

Coursework: compiler construction in Java / ANTLR · Haskell · Prolog · Abstract Algebra

ACHIEVEMENTS

2nd place — HERE GeoSpatial Hackathon, Eindhoven · solo, against teams of three	May 2026
Challenge winner — INEC IT Day · team lead	Mar 2025
1st place — Watt's Up? Hacking for Energy Efficiency, TU Wien · team lead	Feb 2025
Semi-finalist — TON Hackathon	Jun 2024
1st place — Central University Bootcamp	Mar 2024
